FEATURES OF QUIZ APPLICATION.

- **User Authentication**

Users can create accounts, log in securely, and manage their profiles. Authentication is implemented using a combination of Java's security features and password hashing.

- **Quiz Creation**

Users can create quizzes by specifying questions, options, and correct answers. The application supports various question formats, including multiple-choice, true/false, and open-ended.

- **Quiz Taking**

Users can browse and take quizzes created by others. The application provides real-time feedback during quiz attempts, displaying scores upon completion

- **Score Tracking**

Scores from completed quizzes are stored securely in the database. Users can view their quiz history and performance over time
